Movement and Regulation and PE Skills

We will continue to have our daily Movement and Regulation sessions and twice weekly PE skills sessions, where everyone will have the opportunity to develop coordination, spatial awareness, balance, strength and agility, as well as perseverance and resilience too!

Phonics and Reading

We will all continue to develop our phonics knowledge to help us read and write through individual learning tasks. Some of us are developing our writing skills by creating our own sentences about a story. Some of us are focusing on learning new digraphs and others are learning about how each letter makes a different sound.

Marden Vale CE Academy

Honey Bees
Term 2
2.11.26 – 18.12.26

Value of the Term – Thankfulness

English

In English, we will be developing our skills of sequencing stories by recording both which character appears and where they are found. Our main focus for this will be through the story 'Going on an Elf Hunt' before we focus on the Christmas Nativity Story.

Maths

Everyone will continue to develop their maths skills through bespoke learning tasks and songs. This term we will be starting to experience the language of measurement to describe things and we will start to learn the sequence of the months of the year.

Understanding the World Around Us

This term we will be developing our outdoor learning skill; following instructions to find things in our Woodland area to make craft items and following a trail in the playground to collect parts to make elf characters. In our 'Woodland Wandering' sessions we will also be creating different recipes in the 'mud kitchen' but don't worry we won't eat our creations!

We will also be developing our use of Communication Boards to request the resources that we would like to use outside in our garden area. We have some new, fun resources to explore including a giant darts-style board and some foam rocket launchers – it should be fun!
